*Iris Folding is one of my all-time favorite crafting techniques. Iris folding is a paper craft technique that involves folding strips of colored paper in such a way to form a spiraling design.. The center of the design forms an iris-- similar to the shape of the iris of a camera lens.. I know it looks like it could be complicated, but really it is not.*

*The interface bonding bone with dental or orthopedic implants is a typical example of implant biointerface where engineered materials merge into biological environment. Here, the correlative characterization using multiple?length?scale tomography and spectroscopy techniques is applied to probe the chemical structure of the biointerface between human bone and commercial titanium dental ...*
