with otitis media, they are learning to speak and understand words. Children learn to do this by interacting with people around them. It may be harder to hear and understand speech if sound is muffled by fluid in the middle ear. Some researchers report that frequent hearing loss in children with middle ear fluid may lead to speech and language difficulties. However, other researchers have not ...

language and a history of otitis media. 18 This suggests that episodes of hearing loss in infancy can change perceptual capabilities, and this can in turn affect language learning. An Australian study compared the speech perception of Indi-genous children with otitis media with that of peers who did not have otitis media, and non-Indigenous peers without otitis media. 9 All Indigenous children ...
